ABOUT US

LunsfordStudios offers anyone the opportunity to start creating professional content without the complications that come with technology.

We provide the mics, cameras, lighting, and engineer so all you have to do is come in and record, and leave with your files same-day.

Content recorded at LunsfordStudios has potential to reach millions of viewers across a variety of platforms.

HOW IT WORKS

Head to our website, select the studio you want, choose a time slot that works for you, then just click book!

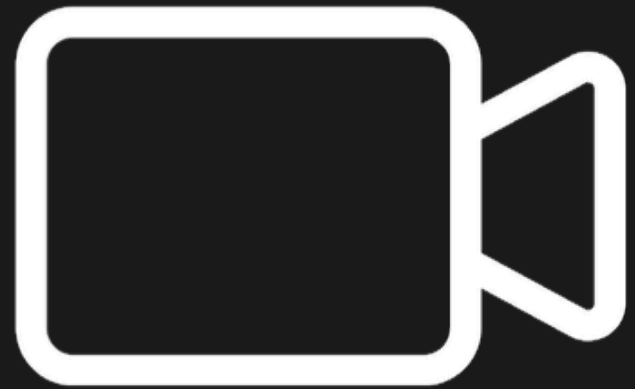

When you arrive we will be set up and ready for you. Each session will have an engineer there to help run your session and make sure everything looks and sounds perfect!

Once your session is over, we will upload the video and the audio to Google Drive, email you a link, and the files will be ready for you to download!

FILE FORMAT

For most podcasts, we provide the live cut of your recording. This means that as you are talking, we are cutting between cameras, leaving you with just 1 file with all of the proper camera cuts already embedded.

If requested, we can provide isolated files from each camera, we just ask that you bring in a Samsung T5 or Samsung T7 SSD.

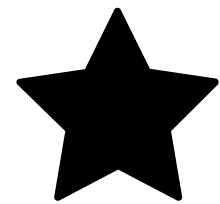

For general content, we will provide the raw files from each camera recording.

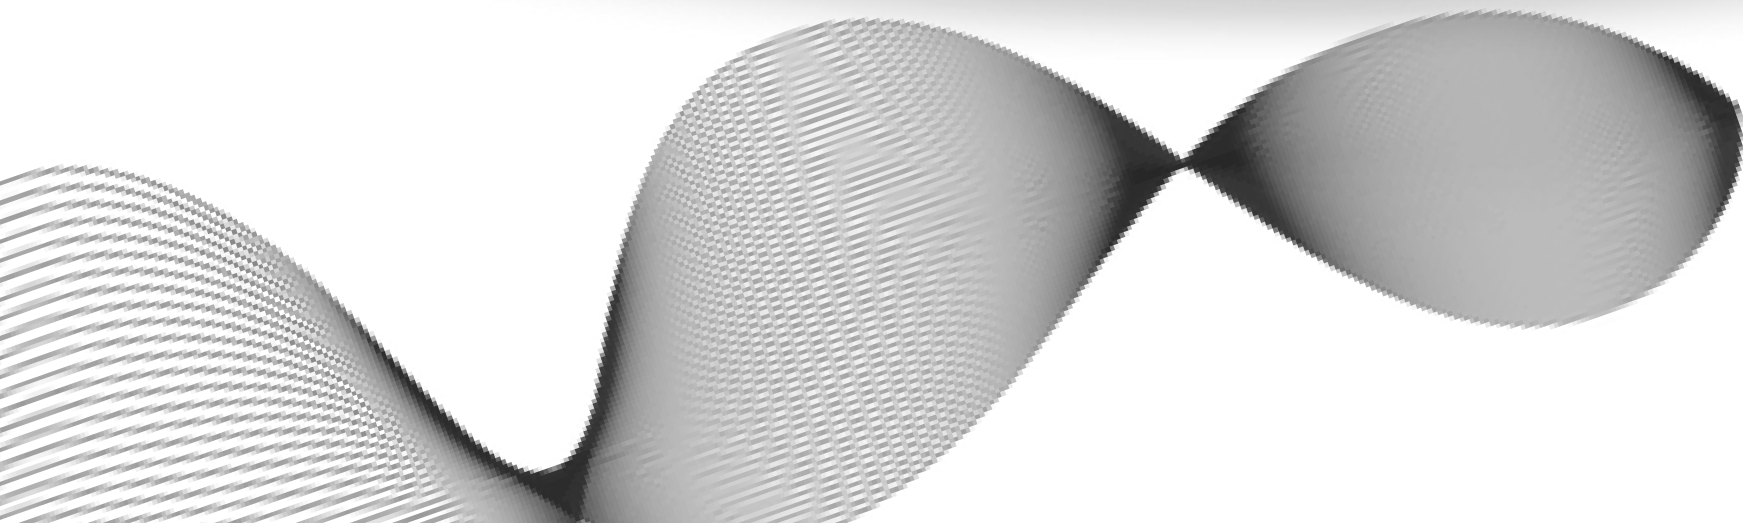

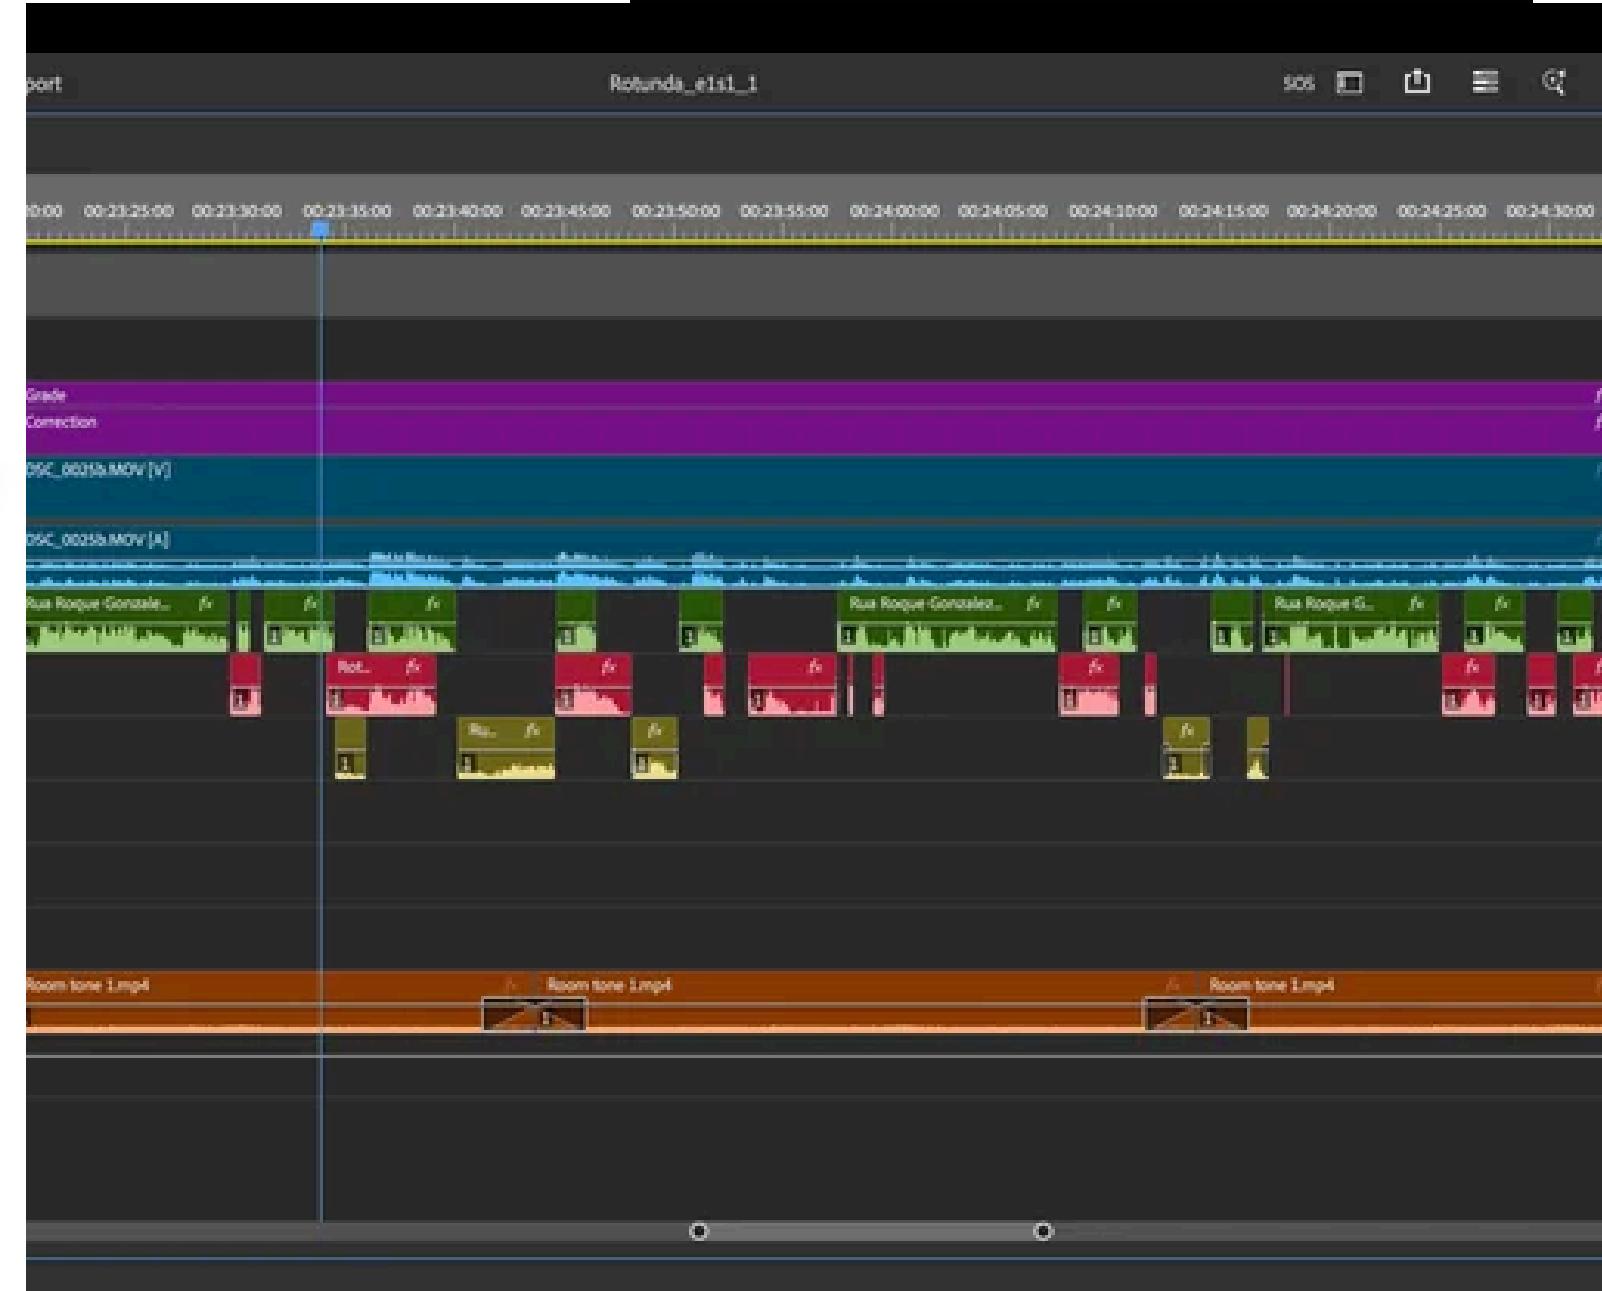

NEED EDITING?

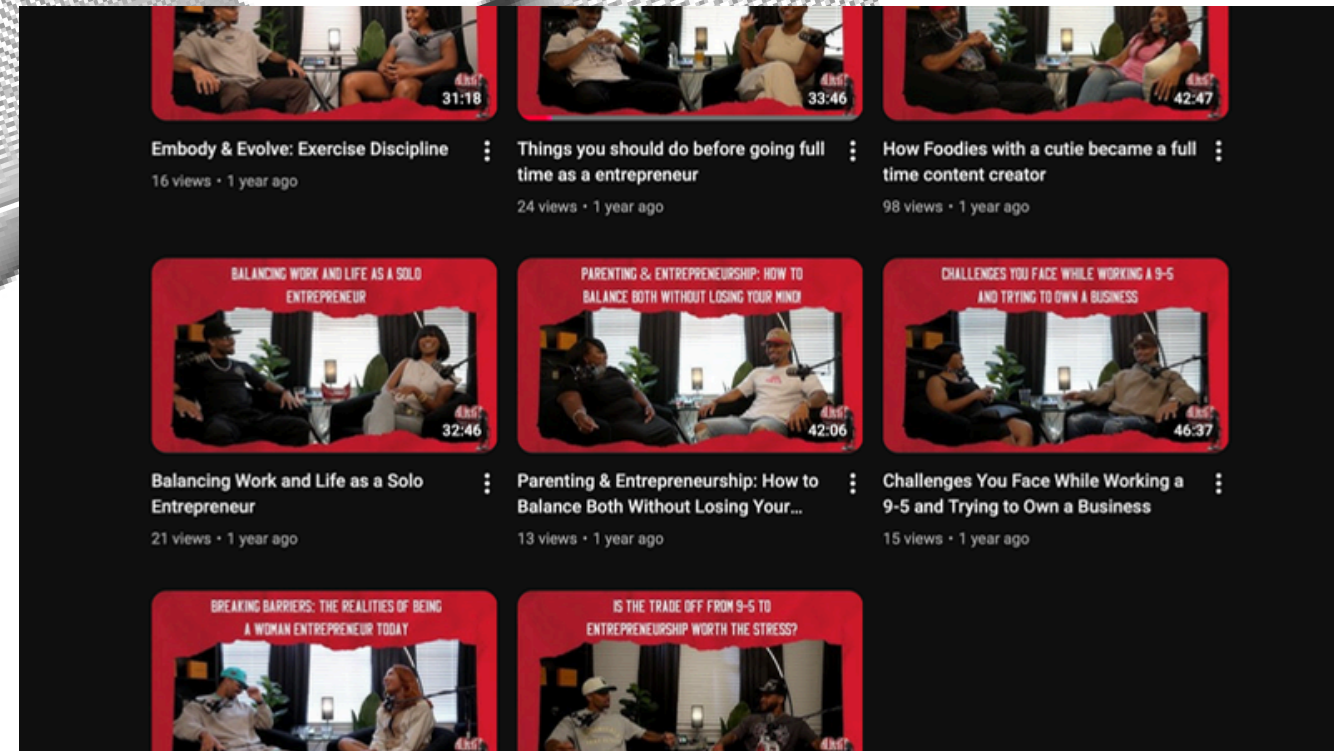

For content creators who purchase a package with us, our in-house editors will work with you to edit your podcast. This includes a sit down with us to discuss ideas, branding, and more!

Edited podcasts can be upgraded to include intro/outro, custom thumbnail, and captioned clips for social media.

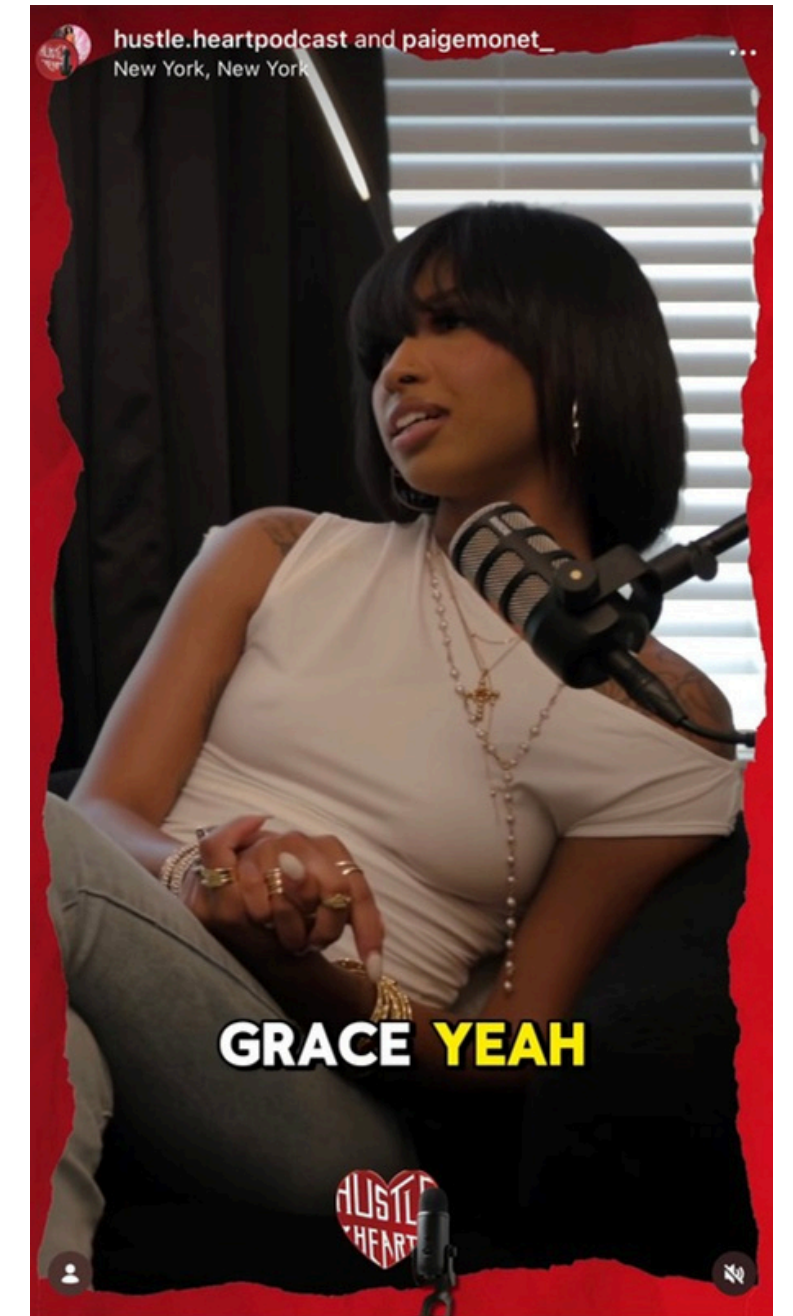

EDITED PODCASTS

Fully Edited Episodes

Social Clips

Custom Thumbnails

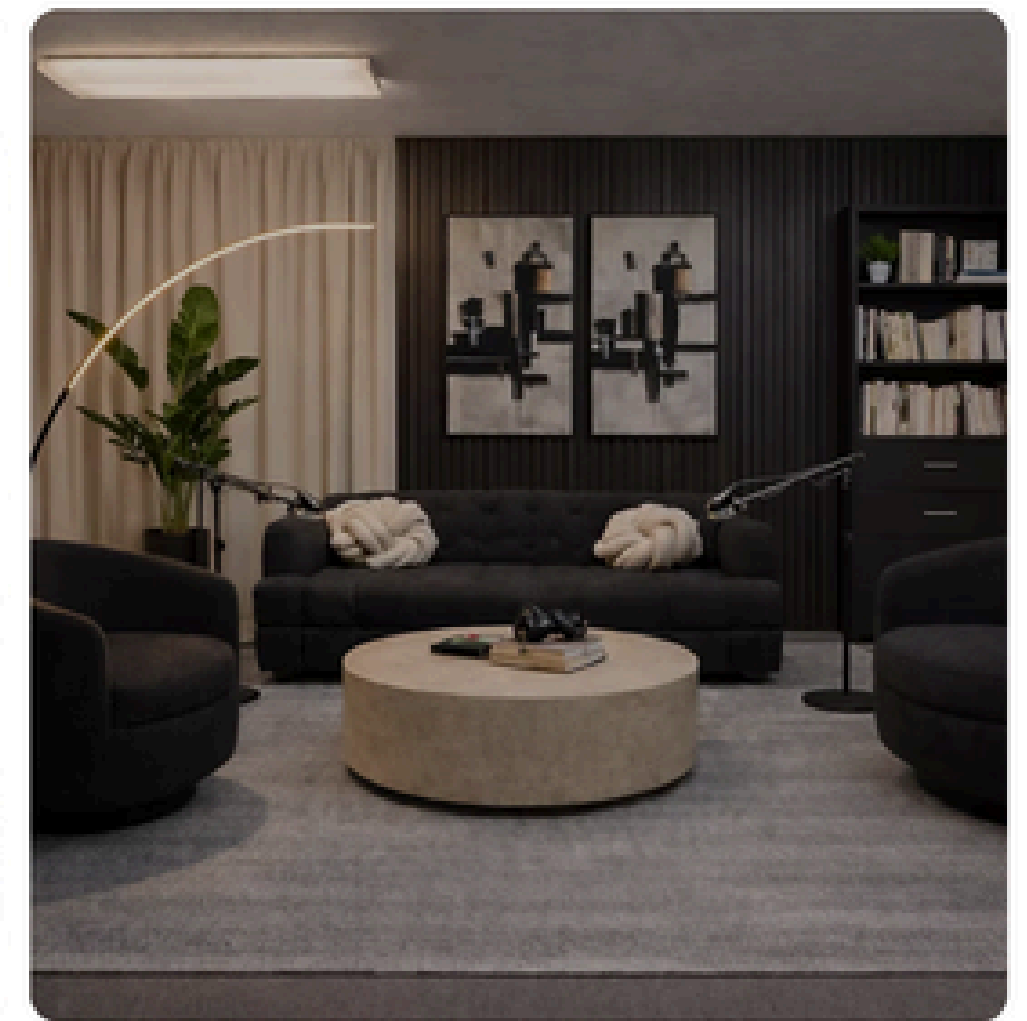

THE LOUNGE SET

Best for one-on-one discussions or small groups.
Fits up to 2-4 guests.

TESTIMONIALS

Christian Campbell

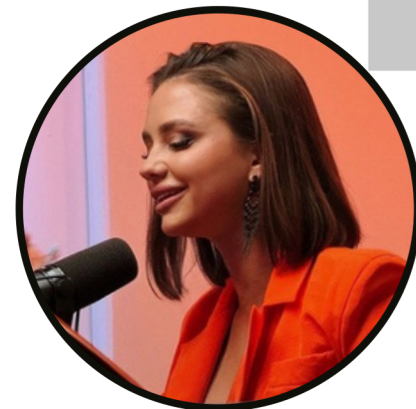

If you take pride in your podcast, this service is a no-brainer. Extremely high quality. Friendly atmosphere. Accommodating. You can tell Tom puts serious energy into his craft. Super clean. VERY HIGH QUALITY. And I don't throw that word around easily.

Katya Reents

Highly recommend this studio to anyone who is looking to start a podcast or create any sort of quality content. Space is well designed and also customizable to your needs. Tom and Colton are both very professional and attentive to all of your requests. You won't be disappointed!

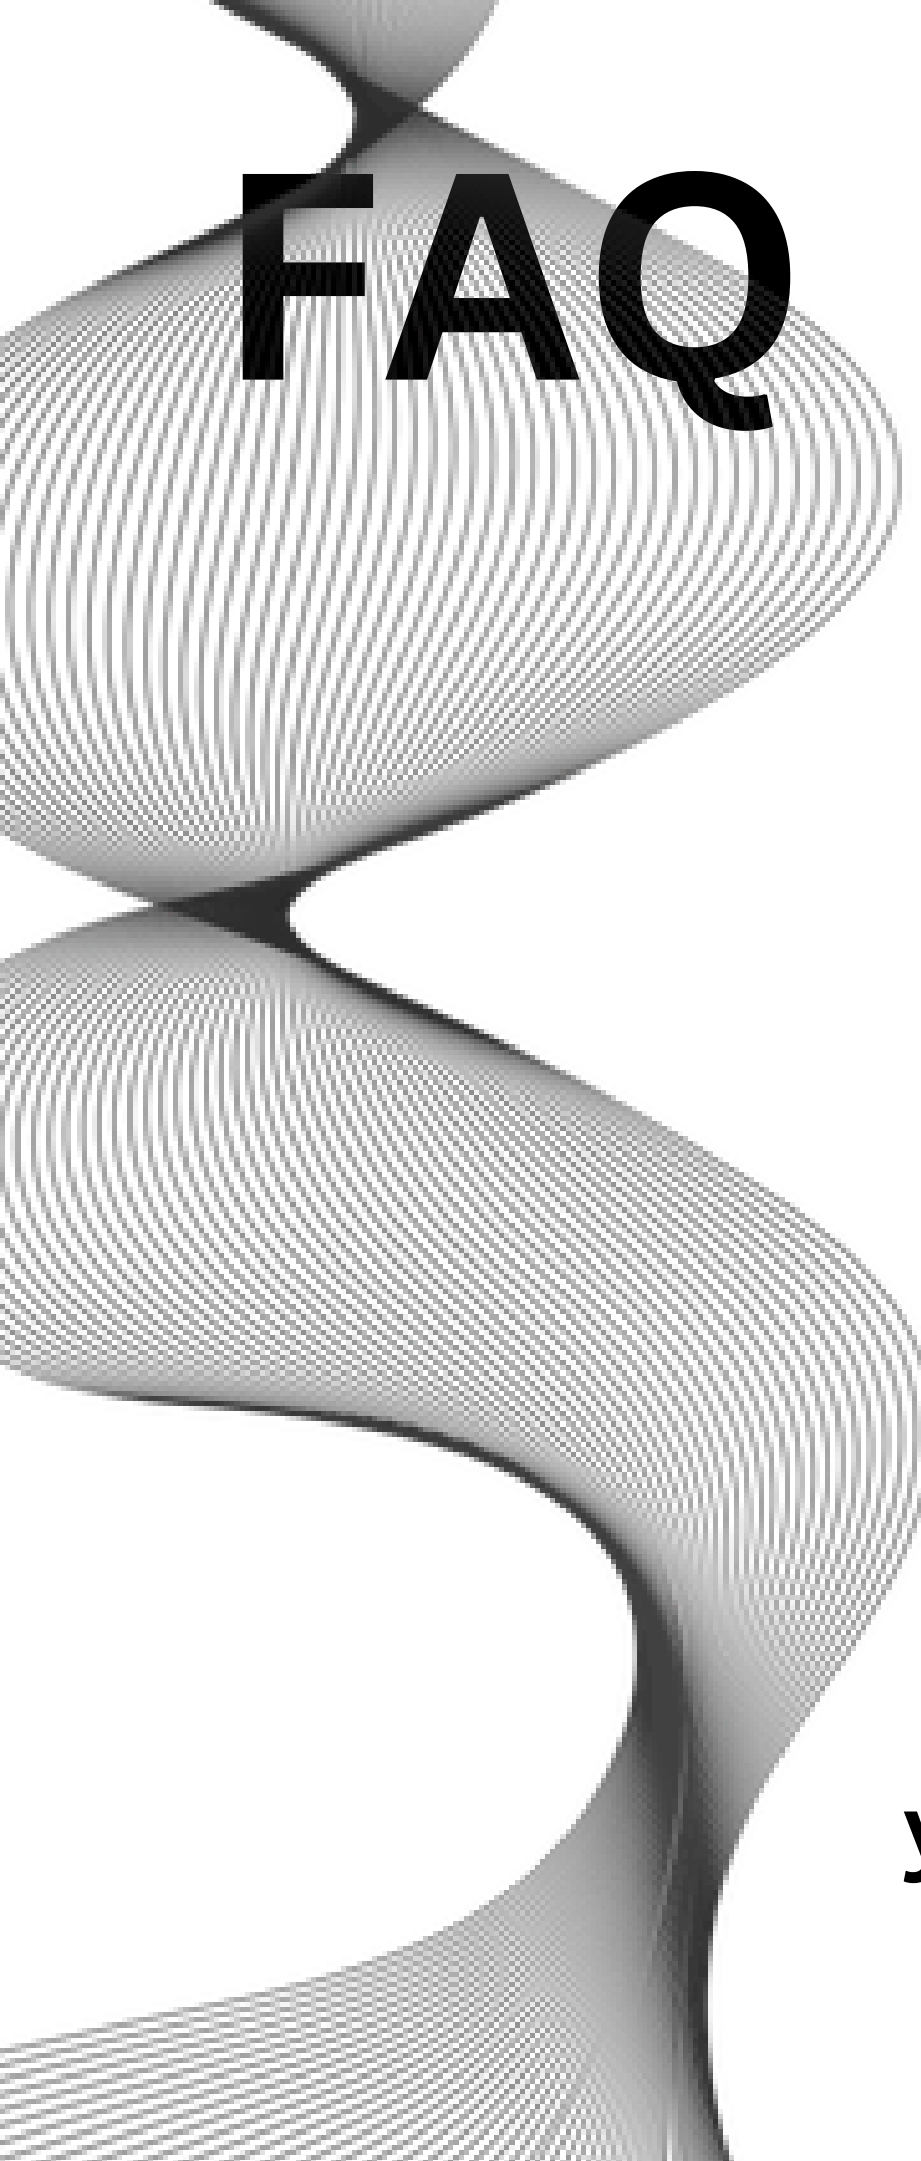

Charlie Witkowski

Professional space and great people through and through. Several successful episodes already and still coming back for more

FAQ

A decorative graphic on the left side of the page shows a hand holding a pen, rendered in a grayscale, wireframe-like style with many fine lines.

Can I come solo?

Yes!

How quickly will I receive my files?

Non-edited: Within 24 Hours

Edited: Typically within 72 Hours.

Can I livestream?

Yes! We have blazing fast internet.

Why would I need editing?

While the 'live' cut will satisfy most, we like to offer additional editing services so that your podcast can be as polished as possible.
